

Suspicious Call Checklist

Five steps to use while a call is happening

1

Hang up

You do not need to stay on the line, even if the caller sounds urgent.

2

Do not pay

Do not send gift cards, cryptocurrency, cash, wire transfers, or payment-app transfers.

3

Keep codes private

Never read a verification code, password, or PIN to an unexpected caller.

4

Find the real number

Use the number on your card, statement, or the organization's official website.

5

Call someone you trust

Ask a family member, friend, or caregiver to help you check the story.

A real organization will let you hang up and verify.
